PROFILE:

Show-Rite Relaxlyx with Tasco is a self-fed, nutrient dense supplement, fortified with elevated levels of electrolytes, vitamins and minerals, with the addition of organic trace minerals and Tasco seaweed meal. This helps overcome nutritional stress associated with weaning, relocating, rebreeding or sale prep, as well as stresses associated with the show ring, such as hauling, show prep, showing and waiting. Relaxlyx fits the needs of all show beef and dairy cattle, as well as breeding boer, show, and dairy goats.

FEEDING DIRECTIONS:

Show Cattle: Use one container per head for individually housed cattle, and one container for every 3-10 head when cattle are housed in groups. Lighter weight, younger calves typically consume between 1 and 4 ounces per head per day. Heavier weight, older cattle typically consume between 0.25 and 0.75 pounds per head per day.

Show Goats: Use one container per head for individually housed goats, and one container for every 3-10 head when goats are housed in groups. Goats typically consume between 1 and 5 ounces per head per day.

All consumption figures stated here are approximate. Provide free access to fresh, clean water at all times.

CAUTION: Use as directed. Consumption of selenium should not exceed 3 mg per head daily for cattle or 0.7 mg per head daily for goats.

WARNING: This product, which contains added copper, should not be fed to sheep or any species that have a low tolerance to supplemental copper.
