*One unit of phytase activity (FTU) is defined as the quantity of enzyme which liberates 1 micromol of inorganic phosphorus per minute. Environmental factors such as feed pH, moisture and processing methods such as pelleting and extrusion may affect enzyme activity.

**One xylanase unit is the amount of enzyme which liberates 1 micromole of xylose per minute under the conditions of the assay.

FEEDING INSTRUCTIONS:

Feed as a sole ration. Always supply a source of fresh, clean water.

Hubbard does not use "Restricted-use Proteins" in their products and is in compliance with FDA and state requirements regarding the use, handling and storage of "Restricted-use Protein" products.

INGREDIENTS:

Please refer to the product label/tag for a complete list of ingredients.

WARNING:

This product, which contains added copper, should not be fed to sheep or related species that have a low tolerance to copper.

This product has been formulated specifically for swine and is not intended for other species.

PROFILE:

1610 is designed to be a reliable feed that you can keep on hand for all types. Need to start lowering protein without sacrificing body and belly? Need to relax some muscle expression to tone down the "extreme" look? Or do you need to simply maintain growth and keep them in show shape? This new approach, featuring multiple fiber sources, allows 1610 to do all of that.
