

# TARGETED NUTRITION Blueprint<sup>®</sup> Sow Premix

# 76252 Blueprint Sow Premix NAB NPP

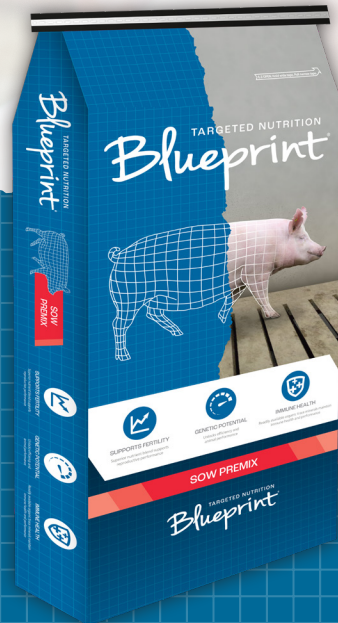

Blueprint<sup>®</sup> is a targeted approach for peak performance. It is founded on scientific research showing that the form in which nutrients are delivered is just as important as the levels included in the diet. Alltech's Total Replacement Technology<sup>™</sup> (TRT) replaces less effective inorganic minerals with 100% organic, high-quality, research-proven trace minerals, promoting better results at lower inclusion levels.

For instance, the Bioplex<sup>®</sup> minerals in Blueprint:

- Support absorption, retention and utilization of key nutrients
- Reduce oxidative stress and supplemental vitamin depletion
- Reduce excess mineral excretion into the environment

Blueprint Sow Premix, tailored specifically to sows, also contains Sel-Plex<sup>®</sup> organic selenium yeast, which promotes reproductive function and supports the immune system.

**Feeding Directions:** Add at a rate of 90 pounds/ton with corn and soybean meal.

With Blueprint Sow Premix, Alltech brings the benefits of Blueprint to your sows with nutritional technologies that:

- Provide better-quality colostrum and increased milk production
- Improve feed quality and feed utilization
- Support piglet survivability and increased weaning weight
- Maximize sow productivity and overall performance

## What can Blueprint do for you?

**+0.75**

pigs born alive per litter

**MORE PIGS**

**+3.3%**

weaning survival rate

**HEALTHIER PIGS**

**0.8 lb**

average weaning weight per pig

**HEAVIER PIGS**

Formulated with Solutions from **Alltech<sup>®</sup>**

**Blueprint<sup>®</sup>**

Targeted Nutrition.  
Without Excess.  
For Peak Performance.
