

TRANSRITE SOW ULTRA

TransRite Sow Ultra uses an encapsulated process that ensures the product is palatable, is not hygroscopic and is released in the small intestine, where it is rapidly absorbed.

FEEDING INSTRUCTIONS:

Top dress TransRite Sow Ultra over normal daily feed at the rate of 25 grams (1 scoop) per head per day for 3 days before parturition. Always supply a source of fresh, clean water.

INGREDIENTS:

Please refer to the product label/tag for a complete list of ingredients.

CAUTION: This product has been formulated specifically for swine and is not intended for other species.

PROFILE:

TransRite Sow Ultra is specially formulated to provide a proper cation-anion balance to reduce farrowing stress by decreasing farrowing time.

GUARANTEED ANALYSIS

Crude Fat (Min)	20.0%
Calcium (Min)	26.0%
Calcium (Max)	31.0%
Chlorine (Min)	49.5%

BENEFITS OF FEEDING TRANSRITE SOW ULTRA:

- Addresses farrowing stress
- Optimizes farrowing time
